

Sotech Limited – Optima Rainscreen Systems

All Optima systems has been independently tested and certified to meet CWCT rigorous specification for rainscreen cladding. The well-engineered and cost effective Optima range is perfectly suited for both new build and refurbishment. The latest 3D design/development software in conjunction with fully computerised CAD/CAM fabrication facilities we are able to manufacture façade systems and ancillary components to the highest quality.

Erie Basin, Manchester

We manufacture rainscreen in a wide range of materials including Pre-Coat, PPC and Anodized Aluminium, Zinc, Copper, Stainless Steel, ACM, as well as high pressure laminate. In particular demand, is our extruded cladding which is cost effective, durable and vandal resistant.

These systems are supported by specialist fabrications such as bull noses, column casing and fascia soffit details.

Sotech prefer to become involved at the design stage of a project providing architects, designers and contractors greater scope in design and material choice to value engineer a project. Together with our accredited installers a complete supply and installation service can be provided.
